

HELIOSOL®

THE POLYVALENT ADJUVANT BASED ON PINE TERPENES
100% VEGETAL ORIGIN

FOR HIGH-QUALITY SPRAY
COMPATIBLE WITH
ORGANIC FARMING
TO COMBINE WITH EVERY
SPRAY ALL ALONG
THE SEASON

ALL CROPS ALL USES REGISTRATION

Product suitable for use in Organic Farming in accordance with Regulations (EU) No 2018/848 and 2021/1115. Control ECOCERT F-32620

The certifications "EcoCert" & "Agriculture Biologique" (biological farming) correspond to European certifications

HELIOSOL®

HELIOSOL® AND ITS RETENTION EFFECT THANKS TO ANTI-REBOUND

PINE TERPENES allow immediate reduction in dynamic surface tension, resulting in:

- > Increase in amount of impacts and a significant improvement in coverage of sprayed mix, even for young plants.
- > More successful treatments on difficult targets, even with products having different modes of actions (systemic, penetrant or contact).

HELIOSOL® ENABLES BETTER SPREADING

Thanks to its spreading ability, HELIOSOL® improves surface coverage.

HELIOSOL® IMPROVES SPRAY QUALITY (ANTI-DRIFT)

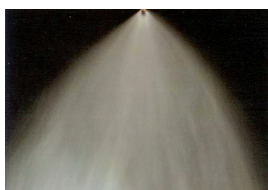

DRIFT LIMITATION

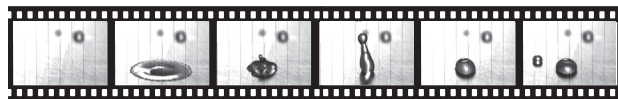

Without HELIOSOL®

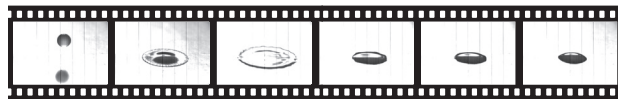

With HELIOSOL®

THE ADHESIVE FORCE OF HELIOSOL ALLOWS AN INSTANT GRIP OF THE MIXTURE AT THE MOMENT OF IMPACT ON THE TARGET/LEAF

(WATER)

(WATER + HELIOSOL®)

Homogenizes size of sprayed drops:

- > Limits drift whatever equipment is used.
- > Secures the spray, even in difficult conditions.

Compatibilisant:

- > Homogenizes size of sprayed drops.
- > Anti-foam.
- > Homogenizes and improves compatibility of combined products in the tank.
- > Polyvalent: suitable for systemic, penetrant or contact products.

Reduces washoff.

THE POLYVALENT ADJUVANT TO COMBINE WITH INSECTICIDES, FUNGICIDES, HERBICIDES AND GROWTH REGULATORS

HELIOSOL® FOR EACH USE

PESTS	MODE OF ACTION	ACTIVE INGREDIENTS
Scab	Anti-rebound, spreading, coverage, limits washoff	Contact products (Copper, Captan), Triazoles, Strobilurines
Aphids, Tortrix moth	Coverage, spreading, retention	Pyrethres, pyrimicard, acetamipride
Powdery mildew	Coverage, limits washoff	Triazoles, sulfur, strobilurines
Psylla, Mites	Anti-rebound, spreading, coverage	Abamectine, Bt, Pyrethres
Weeds	Drift limitation, penetration, foam limitation, coverage	Glyphosate, Glyphosinate...

INGREDIENTS: 665 g/l of terpenic alcohols. Emulsifiable Concentrate (EC).
100 % vegetal origin.

Example of approved used in France: from 0,2% to 0,5% depending on the treatment (fungicide / insecticide or herbicide / growth regulator).

Refer to local approvals and registered uses in your country.

Available in 5, 20 or 1000 L

PROFESSIONAL USE ONLY. USE PLANT PROTECTION PRODUCTS SAFELY. ALWAYS READ THE LABEL AND PRODUCT INFORMATION BEFORE USE.
